PROJECTS

FitCal

Javascript, Handlebars

August 2022- Present

- Built out multifaceted tool for users to both estimate their dietary information of their consumption using third party API's and log and analyze exercise data via password protected accounts and data visualization tools such as Chart.js.
- Managed team using agile methodologies and ensuring the project was polished, debugged, and clean within the deadline.

Repository: <https://github.com/Robdom87/FitCalv2>

Deployed: <https://fitcalxxii.herokuapp.com>

spokenThoughts_API_routing

Express, MongoDB

November 2022

- Constructed routing to create, read, update, and delete users, posts, and reactions within a NoSQL database via URL requests.

Repository: https://github.com/Robdom87/spokenThoughts_API_routing

employee_db_cms

MySQL, Inquirer

September 2022

- Content management system that provides simplified options to send asynchronous requests to view, create, update, delete, and interact with the relational database via the terminal.

Repository: https://github.com/Robdom87/employee_db_cm

EXPERIENCE

Domar Maintenance and Repair

San Diego, CA

Handyman (Family Business/Part-Time)

July 2016-Present

- Currently building company website using HTML5, CSS, Javascript, and SASS to expand online presence and customer acquisition.
- Accelerated company/client matchmaking process by establishing and managing a primary networking system on an online service provider (Thumbtack) and creating a simple template for easy production of invoices and proposals for clients.

NFTaxes Inc.

Los Angeles, CA

Tax Consultant

September 2021- October 2022

- Worked hand in hand with developers to build an automated NFT Tax Calculator which pulls on-chain data to assist NFT traders to calculate estimated tax owed from NFT trading by providing taxation insight and logical infrastructure for MVP.

PricewaterhouseCoopers LLP

Los Angeles, CA

Tax Associate (Area of Focus- SALT)

January 2021- April 2022

- Instructed foreign teams and international associates on state form preparation and running automations which helped reduce preparation time of state returns in crucial moments within the engagement.
- Generated a reusable dashboard within Tableau to compare employee available times against their booked times to optimize employee utilization rates; resulted in a weekly saving of 10 hours for the resource management team.

EDUCATION

UCLA Extension Boot Camp

June 2022- Present
